CHINA DEPLOYING TROOPS ALONG N. KOREA BORDER

April 21, 2016 World Net Daily reported: "China is deploying troops along its border with North Korea, as Pyongyang could be preparing a fifth nuclear test ahead of its Seventh Party Congress in May. The Information Center for Human Rights and Democracy, a nongovernmental organization in Hong Kong, announced Wednesday that Beijing has dispatched 2,000 soldiers along the border, South Korean news service Newsis reported.

China has previously deployed troops along its border with North Korea. In January after Pyongyang announced a "successful" hydrogen bomb test, China reportedly sent 3,000 soldiers to its northeastern region, and also sent troops during the North-South land mine provocation last August...The center also said more Chinese military personnel were stationed at two major observation posts, and the guards are acting as lookouts 24 hours a day."...

Relations between Beijing and Pyongyang have deteriorated since Kim Jong Un fully assumed power in 2012. North Korea has continued to announce tests of nuclear weapons even as Beijing has repeatedly urged the country to work toward denuclearization."..."

SOROS SAYS CHINA'S DEBT FUELED GROWTH ECHOES U.S. IN 2007-08

April 21, 2016 Bloomberg.com reported: "Billionaire investor George Soros said China's debt-fueled economy resembles the U.S. in 2007-08, before credit markets seized up and spurred a global recession.

China's March credit-growth figures should be viewed as a warning sign, Soros said at an Asia Society event in New York on Wednesday. The broadest measure of new credit in the world's second-biggest economy was 2.34 trillion yuan (\$362 billion) last month, far exceeding the median forecast of 1.4 trillion yuan in a Bloomberg survey and signaling the government is prioritizing growth over reining in debt.

What's happening in China "eerily resembles what happened during the financial crisis in the U.S. in 2007-08, which was similarly fueled by credit growth," Soros said. "Most of the money that banks are supplying is needed to keep bad debts and loss-making enterprises alive."

loss-making enterprises alive."

Soros, who built a \$24 billion fortune through savvy wagers on markets, has recently been involved in a war of words with the Chinese government. He said at the World Economic Forum in Davos in January that he's been betting against Asian currencies because a hard landing in China is "practically unavoidable." China's state-run Xinhua news agency rebutted his assertion in an editorial, saying that he has made the same prediction several times in the past."..."

UGANDAN MUSLIM ATTACKS AND THREATENS TO KILL WIFE FOR BECOMING A CHRISTIAN

April 20, 2016 MorningStarNews.org reported: "An eastern Ugandan Muslim who last week attacked his wife for becoming a Christian had told a judge that Islam permits him to kill any apostate, sources said.

Having moved to another village with their four children following an attack last year, Ntende Hawa, 38, said she was visiting her estranged husband to discuss child support on April 4. Her husband, Dapharah Mumpi, was living at the couple's home with his younger brother in Kachomo village in Budaka District, about 130 miles northeast of Kampala. After they had discussed help for their children and Mumpi's brother had gone to bed at about 9 p.m., he began to question his wife about her faith as he had when he attacked her last year, Hawa said.

'Again I answered him that Jesus is my Lord and Savior, and he took a panga [machete 16 to 18 inches long], but I managed to get hold of him before he could hit me, so the panga dropped, and he started strangling me,' she said. 'His younger brother woke up and rescued me. I then managed to escape.'..."

IMAMS PREACHING SAUDI-IMPORTED HATE TEXTS IN BRITISH JAILS

April 20, 2016 Breitbart.com reported: "Muslim chaplains working within Britain's prison system have been routinely distributing Islamist hate literature, leaving extremist pamphlets preaching death to non-believers and hatred of the West within easy reach of inmates, a leaked review has revealed. The Ministry of Justice, who has oversight for chaplaincy appointments within prisons, is understood to have issued an urgent internal alert warning of 'severe reputation damage' thanks to the extremist nature of the material.

The compact discs (CDs) and leaflets, some of which were imported from Saudi Arabia, contain homophobic and misogynistic messages, as well as inciting hatred against non-Muslims and Western culture. Yet it was left by the Muslim chaplains on library bookshelves where inmates were free to come and peruse it, The Times has reported.

Lack of scrutiny inside the jails paired with weak corporate guidance meant that there was very little or even no assessment of the material before it was released to 'impressionable minds', the leaked report said..."

SYRIAN TERRORISTS ACQUIRE ANTI-AIRCRAFT MISSILES

April 19, 2016 The Fars News Agency reported: "The militants in Syria have gained access to anti-aircraft missile systems, the Arabic-language media outlets reported. The anti-aircraft missiles are reportedly Chinese made with FN6 labels on them.

There have been different reports on the crash of a fighter jet in al-Eis town in the Southern part of Aleppo on April 5 with Ahrar al-Sham Movement announcing that it had targeted the military aircraft with its surface-to-air missiles. However, the ISIL said that it had hit the fighter jet with FN-type thermo missile.

Meantime, Al-Nusra Front terrorist group on its twitter page wrote that Ahrar al-Sham had managed to shoot down the warplane in a thermo missile attack.

The Saudi foreign ministry has on different occasions announced that Riyadh will equip the Syrian opposition forces with anti-aircraft missile attacks if the political talks fail. Also, the Russian Sputnik news agency reported that it had gained access to an audio file from a battlefield source. The terrorist commanders spoke over wireless saying that a terrorist group had received 85 anti-aircraft thermo missiles...”

HALF THE FRENCH ARMY IS NOW DEPLOYED ON FRENCH STREETS

April 19, 2016 Breitbart.com reported: “Since the Islamist terror attacks in Paris last November, the streets of major French cities have been guarded by soldiers in full military fatigues. That permanent presence of the French army represents half of all its soldiers now deployed on military operations, but has been dismissed by critics as a political ‘anti-anxiety’ measure.

Following the killing of 132 people in coordinated Islamist terrorist attacks in Paris and its northern suburb, Saint-Denis, last November, President François Hollande, declared the attacks on France an ‘act of war’. In response the French army was sent to the streets of main cities to offer people a sense of security, beefing up operations already begun following the Charlie Hebdo...attacks earlier in 2015.

Representing France’s first wide-scale peacetime military operation on the mainland, Operation Sentinelle deploys fully-armed and uniformed combat troops to patrol public areas and protect key sites such as synagogues, art galleries, nursery schools, Métro stations and mosques. With 10,000 troops across the nation, about 6,500 of which are in the Paris area, the Guardian reports that scale of Operation Sentinelle is so huge it represents the single biggest military operation in volume of any such French operation anywhere in the world.

Representing a fundamental change to how France polices itself and how the army is used, of all the French soldiers now on active military operations, half of them are deployed patrolling streets at home protecting them from further Islamist terror attacks...”

IRANIAN PRESIDENT SAYS ‘WE’LL DEFEND MUSLIM COUNTRIES AGAINST ISRAEL’

April 18, 2016 Arutz Sheva 7 reported: “Iran’s president, Hassan Rouhani, on Sunday vowed to defend Muslim countries against terrorism and Israel, The Associated Press reports. Speaking during a National Army Day parade on Sunday, Rouhani praised Iran’s role in helping the Syrian and Iraqi governments roll back the Islamic State (ISIS) and said, ‘If tomorrow your capitals face danger from terrorism or Zionism, the power that will give you a positive answer is the Islamic Republic of Iran.’

The speech came at the same rally in which Iran paraded its new S-300 missile system which was purchased from Russia. Rouhani emphasized that Iran’s military power was for defensive and deterrent purposes, and should not be seen as a threat to its neighbors...”

ISRAELI EDUCATION MINISTER BENNETT SAYS HAMAS PLANNING ‘YOM KIPPUR WAR-TYPE’ SURPRISE ATTACK

April 18, 2016 Arutz Sheva 7 reported: “Israeli Education Minister and Jewish Home party leader Naftali Bennett has applauded the IDF’s success in locating and destroying a massive terrorist attack tunnel from Gaza into Israel, and warned of Hamas’s continued motivation to launch a major attack. Bennett, who is also a member of the Security Cabinet, said Hamas’s top priority was to carry out a multi-pronged, mass-casualty infiltration attack from Gaza into southern Israeli communities...”

‘In the two years since (Operation) Protective Edge, Hamas was not deterred from re-intensifying its efforts, as we warned,’ he said.

Despite the IDF destroying its entire attack tunnel capabilities – and foiling a massive planned attack against Israeli civilians – Bennett warned that Hamas had turned tunnel construction into a ‘national priority,’ and was investing massively in plans to launch an even greater attack.

‘The time has come to internalize’ the threat, he said.

‘Hamas’s objective is to surprise us with a multi-front infiltration attack, (including) killings and kidnappings,’ he said, describing it as a ‘terrorist Yom Kippur (War)-type scenario.’...”

COULD A SUPER-VOLCANO UNDER YELLOWSTONE NATIONAL PARK ERUPT SOON ?

April 18, 2016 wnct.com reported: “Underneath Yellowstone National Park in Wyoming, Montana and Idaho, there is a reservoir of magma that is more than twice the size that researchers previously thought...They also say that this super volcano has the potential to spew more than 240 cubic miles of magma across Montana, Idaho and Wyoming with global effects. Scientists do believe that it will erupt again one day, but do not know when.

Since Yellowstone is located in a seismic active zone, little tremors occur often. However, seismologists believe that one day there will be a strong earthquake, like the 7.3 that hit the area in 1959...

Scientists believe that this eruption will have global consequences as large amounts of ash and pulverized rock will be thrust into the atmosphere and fall back to earth...linger in the atmosphere, blocking out the sun, causing global temperatures to lower and affect climates around the world.

In addition, Mexico’s Popocatepetl volcano has seen a dramatic Sunday night explosion that spewed ash over the major city of Puebla forcing the city to close the airport. The volcano has been intermittently erupting for more than 20 yrs.”...”

BELGIAN MINISTER SAYS MANY MUSLIMS ‘DANCED’ AFTER ATTACKS

April 17, 2016 Arutz Sheva 7 reported: “Belgian Interior Minister Jan Jambon said Saturday that a ‘significant’ part of the Muslim population celebrated attacks, blaming the country’s policies for failing to integrate migrants into society. He did not explicitly refer to last month’s jihadist attacks on Brussels’ airport and metro system that killed 32 people

‘A significant section of the Muslim community danced when attacks took place,’ Jambon said in an interview with the Flemish-language De Standaard newspaper. The Belgian minister also accused Muslim residents of Brussels’ largely immigrant Molenbeek neighborhood of attacking police during an operation last month to arrest a suspect in connection with the deadly attacks in Paris last November.

‘They threw stones and bottles at police and press during the arrest of Salah Abdeslam. This is the real problem. Terrorists we can pick up, remove from society. But they are just a boil. Underneath is a cancer that is much more difficult to treat. We can do it, but it won’t be overnight,’ he said...”
